

CHAL Outdoor Visitation Policy Guidance per the Colorado Department of Public Health and Environment.

- All visitors will be required to wear a face mask or cloth face covering appropriately throughout the entirety of the visit. Visitors will be required to provide their own face covering.
- All staff and residents must wear a surgical or cloth mask unless doing so would effect the resident's health.
- The visitor(s) must remain in CHAL's designated visitation area throughout the visit.
- CHAL will allow up to 6 visitors during a visitation reservation. Social distancing is required at all times during the visit and will be monitored and enforced.
- All visits will be limited to 30 minutes.
- The designated outdoor area will be monitored to ensure the area remains separated from CHAL's population and community staff.
- When the visit is complete, visitors will be directed to leave the same way they came.
- Failure to comply with these guidelines may result in termination of your outdoor visitation privileges.

How to Protect Yourself and Others

Print Resources Web Page: <https://www.cdc.gov/coronavirus/2019-ncov/communication/print-resources.html>

Know how it spreads

- There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19).
- **The best way to prevent illness is to avoid being exposed to this virus.**
- The virus is thought to spread mainly from person-to-person.
 - » Between people who are in close contact with one another (within about 6 feet).
 - » Through respiratory droplets produced when an infected person coughs, sneezes or talks.
 - » These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.
 - » Some recent studies have suggested that COVID-19 may be spread by people who are not showing symptoms.

Everyone should

Clean your hands often

- **Wash your hands** often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, **use a hand sanitizer that contains at least 60% alcohol**. Cover all surfaces of your hands and rub them together until they feel dry.
- **Avoid touching your eyes, nose, and mouth** with unwashed hands.

Avoid close contact

- **Avoid close contact** with people who are sick.
- **Stay at home as much as possible.**
- **Put distance between yourself and other people.**
 - » Remember that some people without symptoms may be able to spread virus.
 - » This is especially important for **people who are at higher risk of getting very sick**. www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-at-higher-risk.html

Cover your mouth and nose with a cloth face cover when around others

- **You could spread COVID-19 to others** even if you do not feel sick.
- **Everyone should wear a cloth face cover when they have to go out in public**, for example to the grocery store or to pick up other necessities.
 - » Cloth face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the mask without assistance.
- **The cloth face cover is meant to protect other people** in case you are infected.
- Do **NOT** use a facemask meant for a healthcare worker.
- Continue to **keep about 6 feet between yourself and others**. The cloth face cover is not a substitute for social distancing.

Cover coughs and sneezes

- **If you are in a private setting and do not have on your cloth face covering, remember to always cover your mouth and nose** with a tissue when you cough or sneeze or use the inside of your elbow.
- **Throw used tissues** in the trash.
- Immediately **wash your hands** with soap and water for at least 20 seconds. If soap and water are not readily available, clean your hands with a hand sanitizer that contains at least 60% alcohol.

Clean and disinfect

- **Clean AND disinfect frequently touched surfaces** daily. This includes tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html
- **If surfaces are dirty, clean them:** Use detergent or soap and water prior to disinfection.

HOW TO WEAR A NON-MEDICAL FABRIC MASK SAFELY

[who.int/epi-win](https://www.who.int/epi-win)

Do's →

Clean your hands before touching the mask

Inspect the mask for damage or if dirty

Adjust the mask to your face without leaving gaps on the sides

Cover your mouth, nose, and chin

Avoid touching the mask

Clean your hands before removing the mask

Remove the mask by the straps behind the ears or head

Pull the mask away from your face

Store the mask in a clean plastic, resealable bag if it is not dirty or wet and you plan to re-use it

Remove the mask by the straps when taking it out of the bag

Wash the mask in soap or detergent, preferably with hot water, at least once a day

Clean your hands after removing the mask

Don'ts →

Do not use a mask that looks damaged

Do not wear a loose mask

Do not wear the mask under the nose

Do not remove the mask where there are people within 1 metre

Do not use a mask that is difficult to breathe through

Do not wear a dirty or wet mask

Do not share your mask with others

A fabric mask can protect others around you. To protect yourself and prevent the spread of COVID-19, remember to keep at least 1 metre distance from others, clean your hands frequently and thoroughly, and avoid touching your face and mask.

World Health Organization

Stop the Spread of Germs

Help prevent the spread of respiratory diseases like COVID-19.
